**Reasons for Allowance**

The patents to Martin (5,264,679), Karino et al. (5,343,017), and Stava (6,111,216) are cited to show power supplies that include a DC to AC converter for applying AC to an arc load wherein arc re-ignition at the AC waveform zero crossings is an issue.

The following is an examiner's statement of reasons for allowance: none of the prior art of record teaches or suggests a power supply with all of the features set forth in claim 1, particularly the limitations associated with the differentiating circuit connected in parallel with the current-limiting resistor. The other claims are allowable at least because they depend from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Clifford C Shaw at telephone number 571-272-1182. The examiner can normally be reached on Monday through Friday of the first week of the pay period and on Tuesday through Friday of the second week of the pay period.
